RE: Job Requisition ID: R-70562

Dear Ms. Colón,

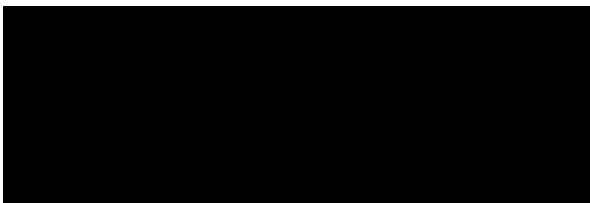

My name is Joseph Lodato, a junior Computer Engineering student at Syracuse University. I am writing to express my interest in the Performance Engineering summer internship, as someone involved in Formula SAE, it would be hard not to hear about your company and the historic success they have had.

At Syracuse I am the president and the head of electronics for the schools FSAE team, Citrus Racing. While there are many students from all over the US involved with FSAE, I believe that I am one of the most well rounded of them. Naturally electronics is my strongest point but as president I made it a priority to learn about all the subsystems of the race car. This on top of my minor in physics makes me incredibly well rounded, something this role requires.

One of my responsibilities of being the head of electronics is data acquisition and processing, one of the core skill sets needed as a performance engineer. With my electrical, mechanical, and data processing skills I truly believe that I will fill the gaps that other applicants will not due to the nature of my well-roundedness.

Thank you for your time, I would love the opportunity to meet with you and discuss the internship opportunity more. Please let me know if I can provide any other documentation for the committee or help in anyway.

Respectfully,

Joseph Lodato
